Experience

IPRO, Lake Success, NY

2001 to Present

Vice President Digital Health

Reporting to the CEO as a member of the senior executive team, promoted over 18-year tenure with a national non-profit servicing Centers for Medicare and Medicaid, Veteran's Health Affairs and fourteen state public health departments culminating in current responsibility for 30 direct reports overseeing Health Informatics, Data Services, Technology Services, Quality Measurement & Reporting, with additional responsibility for board activities and committees.

Accomplishments

Directed the creation of the NYS Sepsis Reporting program to meet regulatory needs. Directed the NYS Provider Network Data System to enable all-payer network adequacy assessment. Convened public/private stakeholder workgroups to create minimally-disruptive platforms with successful uptake by the provider community.

Instituted a corporate shared services model that greatly improves internal customer satisfaction while sharing the cost burden across internal and external clients, reducing overall costs. Introduced data science technology platforms including Tableau, Metabase, R/Shiny, Matillion, Cloud Warehousing.

Designed Web-based informatics engines and requisite data warehouses including the purpose-built "Pellucid"; the largest public health data performance resource in the United States; and the Commonwealth Fund's "WhyNotTheBest" high performing health care data report and Web property.

Developed several new business lines including a rapid application development line specializing in health care data services and solutions (Web and mobile); the Physician Performance Assessment Portal – the country's first electronic self-service physician quality measurement tool (tied to pay-for-performance programs); and a health care report card business line with national recognition.

Pioneered direct, automated quality measurement from the electronic record for public health and individual provider reports enabling real-time quality measurement and population health monitoring.

National speaker on health care transparency, empowered health care consumers, and consumer's use of health data. Advisor/consultant to national consumer entities and numerous government agencies. Visiting scholar/lecturer at St. Joseph's University (NY), MBA/MPH program.

Consistently the highest-rated employee satisfaction of the enterprise, as measured by Press Ganey. Mentored many staff and proctored interns onto excellent positions in the industry. Introduced numerous training and advancement initiatives.

MythMakers, Dijon, France

2015 to 2019

Co-founder, Advisor

Business strategy and technology advisor to a crowdfunding/social network startup for the French “Maker” community.

LUMETRA, San Francisco, CA

2010 to Present

Chief Information Officer

Successfully transitioned a non-profit medical case review operation from legacy IT burden to cloud / mobile office, and various supporting cloud services - while ensuring Federal and State security and contract needs.

Halved the IT budget within nine months by extensively modernizing the corporate infrastructure while carefully managing disruption. Enabled a mobile workplace while maintaining data security and meeting USDOJ, VHA and Emirate of Abu Dhabi cybersecurity requirements.

FAIRCHILD PUBLICATIONS, New York, NY

2001

Consultant

Developed Content Management Systems for several B2B trade publications. Migrated legacy data and created dynamic modules for Web-based administration. Built statistical reporting/traffic analysis Intranet for the Fairchild group of sites. Produced marketing site for the global Women’s Wear Daily launch.

MERLINWEB, Brooklyn, NY

1996 to 2001

Founder, Chief Executive Officer

Founded a novel Web startup managing over 200 Web properties. End-to-end design, development, maintenance and marketing for a range of clients, primarily early-adopter online retail. High Street model allowed local businesses to cooperatively work side by side with capable developers at all stages from design and development through launch and marketing, fostering ownership and empowerment while demystifying the Web.

Developed marketing strategies, studied market response and usability data. Produced content management systems, data query applications, Web-based data systems.

Produced and hosted an Internet radio talk show “The Net Radio Show” on WALE and streamed over the Web.

ADDITIONAL EXPERIENCE

Lived and worked across Wales, England and France. Opened a high street retail store for two years; digitized a performance theatre using an Amiga 500; translated for the 1994 European Chef Tournament.

Created “Twt Cymru”, a bilingual, non-profit Welsh/English Twitter alternative.

English (fluent); French (intermediate); Welsh (beginner).
